

Order confirmation with changes – ORDRSP

With this variant changes are transmitted by the supplier. This is important particularly in the preorder cycle when articles are cancelled from the collection. Only the concerned positions are transmitted.

1.1.2. Message position

A position-splitting can appear. If e.g., 100 parts were ordered and only 60 can be supplied by the delivery date, the other 40 only 3 weeks later, the original position is changed to quantity 60 and a new position with quantity 40 and the new delivery date in the position will be transmitted. A replacement article is transmitted by „rejected“ in the original position and by „added“ in the new position.
