

Overview code lists

1.1. General rules

ISO code lists always apply if existing.

Other notions are related to a partner uniquely. These are e.g. article number, colour code, size and product group of the supplier.

For sizes a European measurement is running. The result is taken over as a standard size.

Material codes are standardized by the German Institute for Standardization with document DIN 60001-4.

There are some areas remaining which have to be defined in addition. Therefore we have created special code lists which are submitted to the standardization and are generally supported by SMEs in fashion retail.

This is concerning :

- DTB Product groups
- WWS Colour codes
- WWS Article classes
- WWS Order types

1.2. Article classes

Code	Name	Note
BAS	Basic article	Article with lifespan > 1 year
NOS	Never out of stock	Basics with 48-hour delivery guarantee
SEA	Seasonal article	
SSC	Short runner	Once produced articles with lifespan < 1 month
SEN	Seasonal article NOS	Seasonal article with 48-hour delivery guarantee

1.3. Order types

Code	Name	Note
BAS	Basic order	Single order of Basic or NOS articles
NOS	Replenishment	Cyclic given order for never out of stock articles, mostly without back order
SEA	Season preorder	
SEB	Season reorder	
OOS	Out-of-stock order
