

WWS Color codes

The color codes are submitted to the standardization. As from our experience this process lasts long time, it is recommended to begin with the application even now.

1.1. Structure of the WWS Color codes

The structure is generally alphanumerically, 5-figure, and for the moment only numeric values are transmitted. Therefore, it has to be considered as alphanumerically, so that the color statement "00000" will not be transmitted as "0".

Main color		Second color		Dessin
Color	Shades	Color	Gradation	
0	0	0	0	0
Basic colors				
0 = no color no statement 1 = white 2 = beige 3 = yellow 4 = red 5 = green 6 = blue 7 = brown 8 = gray 9 = black	0 = no shade no statement 1 = bright 2 = medium 3 = dark 5-9 special			0 = no dessin) no statement 1 = square 2 = stripes 3 = other dessins 9 = multi-colored (no significant color)
Special colors				
35 = gold 36 = orange 45 = pink 55 = kaki 65 = purple 85 = silver				

1.2. Examples

- 00000 = a colorless article
- 10000 = a plain white article
- 90102 = a black-and-white striped article
- 00009 = a multi-colored article; no significant color
